Disorders of Thyroid Gland (240-246)

240 Simple and unspecified goiter

240.0 Goiter, specified as simple

240.9 Goiter, unspecified

241 Nontoxic nodular goiter

241.0 Nontoxic uniodular goiter

241.1 Nontoxic multinodular goiter

241.9 Unspecified nontoxic nodular goiter

242 Thyrotoxicosis with or without goiter

242.0 Toxic diffuse goiter

242.1 Toxic uniodular goiter

242.2 Toxic multinodular goiter

242.3 Toxic nodular goiter, unspecified

243 Congenital hypothyroidism

244 Acquired hypothyroidism

244.0 Postoperative hypothyroidism

244.1 Other postoperative hypothyroidism

244.2 Iodine hypothyroidism

244.3 Other iatrogenic hypothyroidism

244.4 Other specified acquired hypothyroidism

244.9 Unspecified hypothyroidism

Endocrine, Nutritional and Metabolic Diseases, and Immunity
Diseases of the Circulatory System

### 424–425.5 Diseases of the Circulatory System

#### 424. Other diseases of endocardium

**Cardiovascular collagenosis**

#### 424.0 Mitral valve disorders

</thead>
<tbody>
<tr>
<td>424-425.5</td>
<td>Diseases of the Circulatory System Tabular List</td>
</tr>
</tbody>
</table>

### Heart Valve Disorders

- Valve tendon (troubles opening)
- Insufficient valve (troubles closing)
- Shortened, fused chordae tendineae
-佃PV atroventricular (aorta or artery)
- Tenacious, narrow, coarse leaflets
- Aortic regurgitation (backflow of blood)
- Mitral regurgitation (backflow of blood)
- Septal hypertrophy
- Incompetent valve (troubles closing)
- Incompetent valve (troubles opening)
- Incompetent valve (troubles closing)
- Incompetent valve (troubles opening)
Tabular List - Diseases of the Circulatory System 425.9–426.9

426.0 Atrioventricular block, complete

- Third degree atrioventricular block
  - Prolonged P-R interval NOS
  - Mobitz (type) II atrioventricular block
  - Mobitz (type II) second degree, Mobitz (type I) NOS
  - Mobitz (type I) with 2:1 atrioventricular response (block)
  - Wenckebach's phenomenon

- Incomplete atrioventricular block
  - Mobitz (type I) in second degree
  - Mobitz (type II) NOS
  - Mobitz (type II) with 2:1 atrioventricular response (block)
  - Wenckebach's phenomenon: impulses generated at cardiac atrium to ventricle through AV node.

- Other second degree atrioventricular block
  - Mobitz (type I) Wenckebach's phenomenon

426.1 Atrioventricular block, other and unspecified

- First degree atrioventricular block
  - Incomplete atrioventricular block, first degree
  - Prolonged P-R interval NOS
  - Mobitz (type I) atrioventricular block first degree

- Mobitz (type II) atrioventricular block
  - Mobitz (type II) second degree

426.2 Left bundle branch hemiblock

- Block
  - Left anterior fascicular
  - Left posterior fascicular

- Left bundle branch block
  - NOS
  - Anterior fascicular with posterior fascicular complex

426.3 Other left bundle branch block

- NOS
  - Left bundle branch block

426.4 Right bundle branch block

- NOS
  - Right bundle branch block, unspecified

426.5 Bundle branch block, other and unspecified

- Right bundle branch block and left anterior fascicular block
  - Right bundle branch block and left anterior fascicular block

- Other bilateral bundle branch block
  - Bilateral bundle branch block NOS

426.6 Trifascicular block

- Incomplete atrioventricular block NOS

426.7 Anomalous atrioventricular excitation

- Atrioventricular conduction:
  - accelerated accessory pre-excitation
  - Ventricular pre-excitation
  - Wolff-Parkinson-White syndrome

- Wolff-Parkinson-White: normal conduction pathway is bypassed; results in short P-R interval on EKG; tendency to supraventricular tachycardia.

426.8 Other specified conduction disorders

- Wolff-Parkinson-White syndrome
  - Syndrome of short P-R interval, normal QRS complexes, and supraventricular tachycardias

- Long QT syndrome
  - NOS
  - Condition characterized by recurrent syncopes, malignant arrhythmias, and sudden death; characteristic prolonged QT interval on electrocardiogram.

426.9 Conduction disorder, unspecified

- Heart block NOS
  - Stokes-Adams syndrome

Note: The image contains a diagram of the heart and nerve conduction pathways. The diagram includes labels such as the sinoatrial node, atrioventricular node, atrioventricular bundle, bundle branches, and Purkinje fibers.
