Regarding HCPCS Level II

HCPCS Level II codes and guidelines discussed in this book are current as of press time.

Clinical Examples Used in this Book

AAPC believes it is important in training and testing to reflect as accurate a coding setting as possible to students and examinees. All examples and case studies used in our study guides, exams, and workbooks are actual, redacted office visit and procedure notes donated by AAPC members. To preserve the real world quality of these notes for educational purposes, we have not re-written or edited the notes to the stringent grammatical or stylistic standards found in the text of our products. Some minor changes have been made for clarity or to correct spelling errors originally in the notes, but essentially they are as one would find them in a coding setting.
